These materials are provided to you by a grant from the Centers for Disease Control and Prevention to the Kansas Department of Health and Environment (KDHE) Cancer Section. Materials are available for public distribution and you are urged to use these materials to promote colorectal cancer awareness and screening in your facility. Although they may be used throughout the year, Colorectal Cancer Awareness Month is March and facilities are urged to use these posters, brochures and fact sheets along with screening (either Fecal Occult Blood Tests, colonoscopies or other approved methods) in your community in that time period. KDHE will again be providing paid advertising across the state in March 2010. These "Screen for Life" ads will include newspaper placement and radio and TV advertisements for a six-week period beginning in mid-February through the month of March.
