

Ovarian Cancer Awareness Month

Ovarian cancer causes more deaths than any other cancer of the female reproductive system. But when found in its early stages, treatment is most effective. Ovarian cancer often causes signs and symptoms, so it is important to pay attention to your body and know what is normal for you.

Symptoms may be caused by something other than cancer, but the only way to know is to see your doctor, nurse, or other health care professional. For more information, visit www.cdc.gov/cancer/ovarian/index.htm.
